

EXAMPLES OF USE

16 in/out AD/DA MADI Converter FERROFISH A16 MK-II

FERROFISH

Fireface 802

FIREFACE 802 MEETS THE A16 MK-II

The Ferrofish A16 MK-II is a great addition to any audio interface supporting ADAT digital I/O. For instance, when used with the RME Fireface 802, the A16 takes advantage of the dual ADAT I/O ports to expand the Analog I/O by 16 channels, for a total of 28 analog inputs and 28 analog outputs.

MADiface USB

RME MADI SYSTEM AND A16 MK-II

Along with a digital audio interface supporting MADI, the Ferrofish A16 MK-II is a flexible solution for analog I/O. You can daisy chain multiple A16 units for a total of 64 channels on a single MADI optical connection. Thanks to the built-in routing matrix, it's easy to fit the A16 into a more complex MADI system.

Up to 2000 m

DIGITAL SNAKE WITH A16 MK-II

Tired of lugging around a fragile, heavy analog snake? Two or more Ferrofisch A16 MK-II units can be connected with affordable MADI optical cables to carry audio over long distances, even up to 2000 m between devices!
